07 May 2017

Dear Dr Dewi Susana (Editor in Chief of JKMN – UI),

We would like to submit a new manuscript entitled “Level of Exposure of Childhood Tuberculosis with Adult Pulmonary Tuberculosis Household Contacts” for consideration by the Kesmas: National Public Health Journal.

We confirm that this work is original and has neither been published elsewhere nor currently under consideration for publication elsewhere.

In this paper, we report on childhood disease prevention. This is significant because there is limited research regarding to this study. So we do believe this paper should be of interest to readers in epidemiology particularly to researchers working on childhood tuberculosis prevention that still rarely reported.

We believe these findings will be of great interest to childhood infectious disease prevention generally, and particularly to researchers working on childhood tuberculosis prevention. As the premier international journal devoted to the rapid dissemination of significant tuberculosis findings, “Asian Journal of Epidemiology” represents the perfect platform for us to share these results with the international research community.

Please address all correspondence concerning this manuscript to me at al_asyary@uhamka.ac.id.

Thank you for your consideration of this manuscript.

Sincerely,

Al Asyary
